EDUCATION

Bachelor of Science, Computer Science

Concentration: Software Engineering

California State University - Monterey Bay

Honors / Awards: Dean's List, Magna Cum Laude

Graduated: May 2020

GPA: 3.85

PROJECTS

FormSpin

Jan 2021 - Feb 2021

- Created a React web app allowing users to interact with and draw 3D forms
- Leveraged JavaScript libraries for 3D model and canvas drawing, adding more functionality on top of them

Rock Immortal Framework

Feb 2020 - May 2020

- Established the Python backend of the company's open-source web ticket sales framework
- Integrated a serverless microservices architecture using AWS, reducing financial burden

Resumuffin

Nov 2019 - Dec 2019

- Developed the Java Spring backend for a resume review web app as part of a pair
- Engineered REST API backed by a PostgreSQL persistence layer with 15 endpoints

Monterey Bay Twitter Bot

October 2019

- Coordinated a team of five competing in the Startup Monterey Bay 2019 Hackathon
- Incorporated four different API calls using Python to gather data on local conditions

PictureThese

Apr 2019 - May 2019

- Led a team of four in producing a web app for learning languages via images
- Mentored teammates in Python and API calls while developing the frontend, resulting in double the productivity

COMPUTER SKILLS

Languages: Java, Python, JavaScript, HTML, SQL

Tools: Bash, Github/Git, React, Gatsby, Spring, Amazon Web Services
